SUPRA 2.0

Proven modular - technically innovative.

Designed and hand built in Germany.

SUPRA 2.0

SUPRA 2.0 - Proven modular - technically innovative:

As the successor to **SUPRA**, **SUPRA 2.0** retains at the proven framework concept with its extremely flexible adjustment and growing options.

Screw connections and components no longer have to be moved, but only be loosened and shifted. A 4 and a 5 allen key are sufficient.

An innovative castor fork bearing (patent pending) enables the angle to be adjusted using a single nut only. In addition, the entire bearing can be rotated around the vertical axis with the nut loosened, which enables the adjustment of an exact straight-line stability.

SUPRA 2.0 - an overview:

- Proven modular frame concept
- Technically innovative
- Modern design
- Simplified handling
- New castor fork bearing
